

## UNIT ASSEMBLY INSTRUCTIONS EP095M-Protect

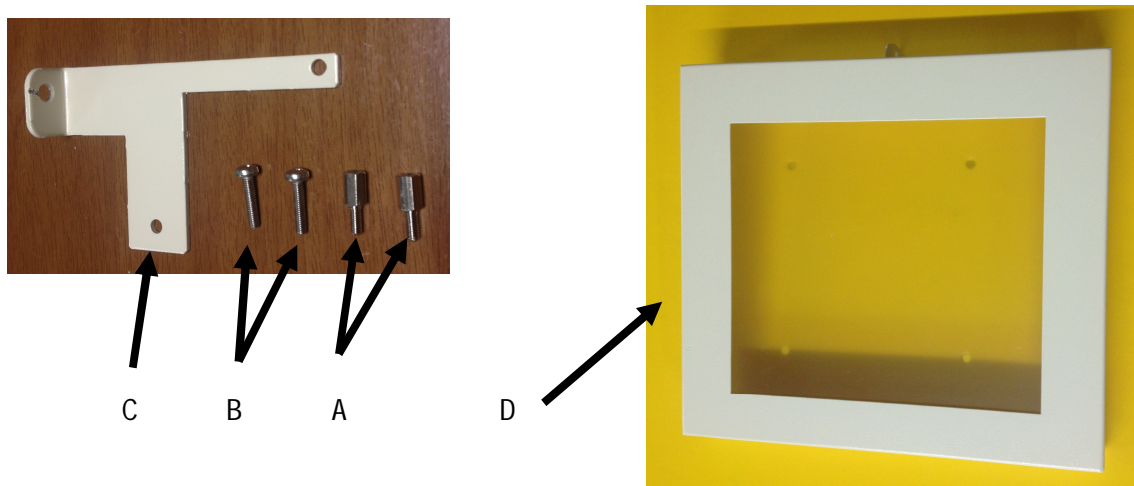

# Multi-Pull

### 1. GENERAL

The "EP095M-Protect" unit allows you to protect the EP095M control unit from any tampering by unauthorized persons, while still leaving the display visible and allowing shooters to insert chip cards as usual to reserve a round automatically .

### 2. COMPOSITION

The "EP095M-Protect" unit consists of the following elements:

### 3. ASSEMBLY

1. Unscrew the two screws located on the back in the upper part from the EP095M control unit
2. Unscrew the two screws located on the front next to the chip card reader from the EP095M control unit
3. Replace the two screws on the back with the spacers **A** that are part of the kit
4. Apply block **C** to the front of the EP095M control unit using the two screws **B** that are part of the kit
5. Apply the metal front panel **D** on the upper part of the EP095M control unit so that the two spacers **A** enter the rear holes. Then with a padlock lock the front panel so that no one can take it apart.
